STEP-BY-STEP PROCEDURE

1. HUD accepted consultant who prepares this work write-up (or an architect, engineer or home inspection service) needs to inspect the property to assure: (1) That there are no rodents, termites and other infestations: (2) that there are no defects that will affect the health and safety of the occupants: (3) the adequacy of the existing structural, heating, plumbing electrical and roofing system: and (4) the upgrading of thermal protection (where necessary). The inspection report will be attached to the document.
2. Complete each item below as necessary by either filling out the information on the work to be preformed with a brief explanation, or entering "NONE" in the "SUB-TOTAL" Portion if no work is being performed in that particular subsection to the document.
3. The proposed work, and the materials used, should be explained in detail to assure a complete understanding on the required work by the contractor and the HUD authorized fee inspector. For major items (ie. kitchen cabinets, appliances, heating ,air conditioning etc.), the description or the item should enclose the make and model number (manufacturer's) brochure can be attached).
4. Attach a copy of any proposals from all contractors and/or subcontractors.
5. Provide other drawings as necessary to assure a complete understanding of the required work by the contractor and the HUD authorized fee inspector. The following architectural exhibits are required:
 - a) A Plot Plan of the Site is required only if a new addition is being made to the existing structure. Show the location elevations at the property corners and building structure(s), walks, drives, streets, and other relevant detail. Include finished grade corners to assure proper drainage of water off the site. Show the required flood elevation.
 - b) Proposed Interior Plan of the Dwelling. Show where structural or planning changes are contemplated; include any dwelling.
 - c) Provide kitchen cabinet elevations, deck drawings and other exhibits as necessary to properly describe the required Architectural exhibits for a new addition are the same as for a newly constructed home.
6. Cost estimates must include labor and materials sufficient to complete the work by a contractor.
7. A homebuyer who would like to do any of the work must submit a letter to the lender stating his/her qualifications to perform the work in timely and workmanlike manner. If approved by the lender, the homebuyer cannot eliminate the cost estimate for labor because if the homebuyer cannot complete the work there must be sufficient money in the escrow account to get a subcontractor to do the work.
8. If this is a purchase transaction and not a refinance, then attach a sales contract (the loan should go contingent upon obtaining FHA 203(k) financing).
9. Transfer costs shown on the last page to the Draw Request (HUD 9746-A, VMP-436).
10. Meaning of Abbreviations:

Each = Ea Linear foot = LF Square Foot = SF Lump Sum = LS Square Yard = SY * = Required

M = Mandatory By HUD, R = Recommended By Consultant/Other, D = Desired By Homeowner

EA = Each LF = Linear Foot LS = Lump Sum SF = Square Foot Sq = Square SY = Square Yard
